

Dear Neighbour,

I am writing to let you know about an issue you may be unaware of. This is related to a dog I believe to be at your property. Unfortunately, the dog is barking a lot and the noise is causing an issue for me.

I understand there are many reasons why dogs may bark and know that the dog owner may not be aware that the barking is causing an annoyance to others. I sought some advice from Maroondah City Council who have information available that may be of assistance in resolving the problem.

Enclosed with this letter is a flyer that may help reduce the barking, alternatively the Maroondah City Council website has additional information and links that could be of assistance. Please visit www.maroondah.vic.gov.au/Barking-dogs or scan the QR code below to access this information. I hope this information helps to resolve the issue without having to make a formal complaint.

Regards, Your neighbour.

P.S. From my observations, the dog appears to bark at the following times:

Simple tips for reducing barking

There are a number of approaches you can try to address excessive barking:

- > Make sure that you do not reward your dog for barking too much. Don't let the dog inside or give it attention when it barks. Instead, give the dog attention when it is quiet.
- > If the dog is barking at people or noises on the other side of a fence, move the dog to another part of the yard, or put up a barrier to keep the dog away from that area.
- > If the dog barks at regular disturbances, such as children walking to school or rubbish trucks, keep the dog inside or in an enclosed area at these times.
- > If the dog races along a path or fence barking at passing distractions, put barriers or obstacles in the dog's way to slow it down.
- > Ensure that the dog has adequate exercise and obedience training.
- > Make sure that the dog has food, water and shelter from the weather.
- > If the dog is barking at gaps and cracks in the fence, fill them in.
- > If the dog is barking at people it can see passing by, try blocking the dog's view.
- > Teach the dog to stop barking on command. When the dog is barking give a firm command such as 'cease' and call the dog to you.
- > Praise the dog when it stops barking.

Dogs bark for many reasons and, if these simple tips do not help, seek further advice.

Dog obedience

To get your dog into good habits it is recommended that you enrol your dog in a dog obedience club. Qualified instructors will teach owners how to walk their dogs on a loose lead, and sit, stand and drop on command. This is generally followed by expanded exercises to include stay, recall and stand for examination. Socialisation with other dogs and people is important and this is heavily emphasised.

As the dogs and handlers progress through the classes the exercises are refined so that eventually the dogs respond to their handler's commands whether on or off lead. Dog obedience and regular training can provide mental and physical stimulation and help prevent 'boredom' barking.

Useful contacts/resources
